Mental Wellness

Growing up, most of us were educated about ways to take care of our physical health. But very few were educated on how to take care of our mental health. That changes now.

Everyone has mental health, just like everyone has physical health. The real question is, what can we do to optimize our mental health and live a life full of mental wellness?

Amare's Platform of Products, Programs, and People provides holistic and natural solutions to empower lives full of vigor, positivity, and performance.*

Amare FundaMentals™

Revolutionary Nutrition for All Three Brains

The award-winning Amare FundaMentals™ products provide comprehensive nutrition for all three brains — gut, brain and heart.*

WHAT IS THE GUT-BRAIN-HEART AXIS?

Our three brains: gut (sensing brain), mind (thinking brain) and heart (feeling brain) determine our emotions and are the most powerful tools in optimizing our mental wellness.

It is the coordinated action of our three brains — and the interplay between them — that ultimately determines our overall mental wellness.

Best New Finished Product

The Amare FundaMentals Pack® WON the 2018 NutrAward for Best New Finished Product!

MentaBiotics®

*Advanced Gut-Brain Nutrition**

The most comprehensive combination of unique strains of probiotics, prebiotics and phytobiotics that have been scientifically shown to improve mental wellness.*

FOR YOUR GUT...

THE PROBIOTIC STRAIN MATTERS

There are over 10,000 different species of bacteria in our gut, but there are millions of strains comprising billions of bacteria overall. Amare's strains of bacteria are unique and have specific functions around mental wellness.

MentaHeart®

*Advanced Heart-Brain Axis Nutrition**

The first product of its kind to support mental wellness through the heart-brain axis, MentaHeart features key ingredients backed by multiple clinical studies shown to help optimize the heart, the body's third brain.*

FOR YOUR HEART...

Studies have now shown that the heart is the body's third brain, containing approximately 40,000 neurons that can sense, feel, learn and remember. When the heart is not in optimal condition, mental wellness problems may manifest and be misunderstood as issues with the brain, when they are actually originating from the heart. MentaHeart helps connect what we feel (heart/emotions) to what we know (brain/intelligence).*

Amare Gets Down to the Strain Level

There are approximately 300-1,000 good bacterial species in our gut, but there are millions of strains of each species comprising billions overall. Most probiotics on the market provide facts about the genus and species, but don't pay as much attention to the strains. Amare focuses on specific strains of bacteria because that is where the wealth of benefits exist.*

Genus (*Lactobacillus*)

Species (*acidophilus*)
