MENTAL
WELLNESS
NUTRITION*

The first comprehensive mental wellness pack for kids and teens, the Amare Kids Pack is formulated to support full mind and body nutrition.*

As kids and teens grow, their minds and bodies are continuously developing. However, we seem to overlook the importance of that development when we're young. After all, we're all taught how to take care of our physical health at a young age, but what about our mental health? It's just as or more important, yet we tend to only focus on the body's impact on our well-being. It's time for a change. Mental wellness can no longer be looked as an afterthought — in fact, it's actually the primary driver of health and happiness.

Kids and teens especially need products that will help develop, support and optimize both the mind and body. With the Amare Kids Pack™, all three of Amare's signature kids products are included, making it a complete mind and body nutrition system for kids and teens.

Kids FundaMentals®, the offspring of our award-winning Amare FundaMentals Pack®, connects the gut and brain to enhance the communication between both brains in kids and teens. Kids VitaGBX balances both the mind and body, plus provides the key nutrients kids and teens need as they grow. And finally, Kids Mood+ supports youth stress resilience and a better mood.

The best of the best. That's what you get with the revolutionary Amare Kids Pack. The best gut-brain axis support. The best full-body vitamins. The best mood-boosting nutrition. The first all-natural formulation of its kind to empower your kid from head to toe so they can be their best — student, artist, athlete, servant leader — *self*. That's comprehensive mind and body nutrition for growing kids and teens.*

- 1 Supports full mind and body nutrition for growing kids and teens*
- 2 Provides comprehensive mood support and stress resilience*
- 3 Promotes immune system efficiency*
- 4 Improves psychological vigor (physical energy, mental acuity and emotional well-being)*
- 5 Improves concentration, attention and mental alertness*
- 6 Normalizes neurotransmitter activity, including serotonin and dopamine*
- 7 Reduces stress hormones and inflammation*
- 8 Supports memory improvement and efficiency*
