

HempGBX+™

full-spectrum hemp oil

A full-spectrum hemp extract that may naturally support the body's endocannabinoid system, HempGBX+™ may amplify the benefits of an optimized gut-brain axis.*

MAY HELP BOOST MOOD AND STRESS RESILIENCE*

MAY SUPPORT INCREASED SLEEP QUALITY*

MAY HELP ALLEVIATE BODY ACHES AND PAINS*

Few ingredients or products in the natural products industry have created as much buzz or news as hemp! The emerging science of hemp extract's impact on the body's endocannabinoid system and the associated benefits are promising. All hemp products are not created the same though! There are tons of bad players in the space, delivering low quality, low efficacy and sometimes even toxic or dangerous products that contain harmful chemicals. When it comes to choosing a hemp product, you need to go with a brand you trust that has high integrity and quality control.

Amare HempGBX+ is a full-spectrum hemp extract that may naturally support the body's endocannabinoid system, potentially amplifying the benefits of an optimized gut-brain axis. Specifically formulated to synergistically complement Amare's robust lineup of all-natural mental wellness products, HempGBX+ may amplify mental wellness benefits, such as positive mood and may support stress resilience, better sleep quality, relief from aches and pains, and more.*

The body's endocannabinoid system is another pathway to potentially support mental wellness through all-natural methods. The gut microbiome and gut-brain axis are primary pathways with the endocannabinoid system being a supporting pathway. By "stacking" or combining HempGBX+ with other Amare products such as the FundaMentals Pack, Mood+, Sleep+, Relief+, or Energy+, the benefits may be amplified and enhanced when the products are taken together.

When many people hear "hemp," they think "marijuana," but they're completely different plants with very different chemical properties. Hemp grows to around 20–25 ft. tall and resembles corn stalks, and contains very low quantities of the psychoactive compound THC. Marijuana is a short bush that is usually only a few ft. tall and contains high quantities of THC. The full-spectrum hemp extract in HempGBX+ is tested and verified by a third-party lab to ensure it contains less than 0.3% of THC. This is in compliance with The Hemp Farming Act of 2018, which removed hemp (defined as cannabis with less than 0.3% THC) from Schedule I controlled substances, making it an ordinary agricultural commodity. So, our HempGBX+ doesn't have psychoactive or "high" effects due to this extremely low THC content.

In addition to the high-quality full-spectrum hemp extract, HempGBX+ also features organic black pepper oil, black cumin seed oil and organic white frankincense oil. These key ingredients on top of the premium full-spectrum hemp extract may provide additional benefits, such as support for digestion, inflammation regulation, immune system function, memory recall, cognitive health, and overall cellular function.

Adding HempGBX+ on top of the Amare FundaMentals Pack® may fully optimize the gut-brain axis and endocannabinoid system. The ingredients in the Amare FundaMentals Pack may prime the body's ECS receptors through the body, which then could be fully activated by the ingredients in HempGBX+. This unique one-two punch could restore homeostasis across the entire body like no other product system.*

- 1 May help alleviate body pains*
- 2 May promote stress resilience and mood support*
- 3 May help improve sleep cycle*
- 4 May support body's natural production of endocannabinoids*
- 5 May help activate the body's endocannabinoid system*
- 6 Less than 0.3%, so no psychoactive effects*

WHAT MAKES HEMPGBX+ DIFFERENT?

In addition to the high-quality full-spectrum hemp extract, HempGBX+ is formulated with organic black pepper oil, black cumin seed oil and organic white frankincense oil. These oils were specifically added to the formula to potentially bring more complete activation across the entire endocannabinoid system. This may be achieved by activating both CB1 and CB2 receptors in the brain, gut and immune system. In particular, black pepper oil is rich in terpenes, which may add to the entourage effect. Black cumin seed extract may enhance the inflammatory balance effects of the full-spectrum hemp oil by a factor of 7–10x. These key ingredients on top of the premium full-spectrum hemp extract may provide additional benefits:

Full-Spectrum Hemp Extract

- May help alleviate body pains*
- May promote stress resilience and mood support*
- May help improve sleep cycle*
- May support body's natural production of endocannabinoids*
- May help activate the body's endocannabinoid system*

Black Cumin Seed Oil

- May provide anti-inflammatory and antimicrobial benefits*
- May help improve blood sugar and cholesterol levels*
- May enhance memory and cognitive health*

Organic Black Pepper Oil

- May help with digestion and decreases inflammation*
- May stimulate the immune system*
- May include anti-viral properties*

White Frankincense Oil

- May support overall cellular function*
- May revive and rejuvenate skin health*
- May promote respiratory health*

THE QUALITY DIFFERENCE

The emerging science of hemp extract's impact on the body's endocannabinoid system and the associated benefits are remarkable; however, all hemp products are not created the same! There are multitudes of bad players in the space, delivering low quality, low efficacy, and sometimes even toxic or dangerous products that contain harmful chemicals. When it comes to choosing a hemp product, you need to go with a brand you trust that has high integrity and quality control. Amare is that brand you can trust.

ORGANICALLY GROWN HEMP

Sources derived and grown in the U.S. from seed stock that is verified to be certified industrial hemp

PUREST FULL-SPECTRUM HEMP OIL

Quality derived from the least processed extraction method of hemp cannabinoids in the rawest form

THIRD PARTY TESTED

Full panel and microbiology tested by an independent lab, ensuring only the purest extract

*THESE STATEMENTS HAVE NOT BEEN EVALUATED BY THE FOOD AND DRUG ADMINISTRATION. THIS PRODUCT IS NOT INTENDED TO DIAGNOSE, TREAT, CURE, OR PREVENT ANY DISEASE.

BEYOND JUST AN ISOLATE — PUREST QUALITY FULL-SPECTRUM EXTRACT

HempGBX+ is a full-spectrum hemp oil, which means it contains all components of the hemp plant. Full-Spectrum means full benefits!

After extraction, our hemp oil contains...
Cannabinoids, Terpenes, Vitamins, Minerals, Fatty Acids, Phytonutrients, and Additional Plant Materials

These ALL synergistically may provide greater results than any endocannabinoid isolate by itself.

Recommended Use: Take 1 ml dropper by mouth or mix in with your drink or food as needed. Do not exceed 2 ml per day.

HempGBX+ FAQs

1. How is HempGBX+ different than other products on the market?

HempGBX+ is a full-spectrum hemp oil, which means it contains all components of the hemp plant. Unlike other Hemp oil products, our products contain the beneficial phytocannabinoids along with a synergistic set of ingredients that activate and may improve the bioactivity of the phytonutrients. (see below)

1. US Sourced from Farm to Finished Good
2. Full Spectrum Entourage Effect (standardized to 20mg cannabidiol)
3. Ultra-pure extraction
4. Combined with synergistic ingredients to improve bioactivity (see below)
5. Activates CB1 and CB2 Receptors
6. Thymoquinone & Frankincense Oil – may enhance endocannabinoid system activation
7. Extra virgin olive oil
8. World's only dual-function patent-pending formula to both prime endocannabinoid system (ECS) receptors and activate the entire ECS for true holistic rebalancing benefits.

2. What are the benefits if HempGBX+ is taken alone, without other Amare products?

Amare's HempGBX+ is a full-spectrum hemp extract that may naturally support the body's endocannabinoid system, potentially amplifying the benefits of an optimized gut-brain axis. Specifically formulated to synergistically complement Amare's robust lineup of all-natural mental wellness products, HempGBX+ may support mental wellness benefits such as positive mood, stress resilience, sleep quality, temporary relief from aches and pains, and more. If the product is taken alone, you may only experience the activation of the endocannabinoid system (good), vs a potential amplification the endocannabinoid system in concert with multiple other rebalancing pathways (better).

3. Can Subscribe & Save Rewards points be used for HempGBX+?

No, Subscribe & Save Rewards (SSR) Points cannot be used to redeem products. However, you may earn SSR Points from your HempGBX+ order.

4. What is the return policy for HempGBX+?

Amare's satisfaction guarantee & full return policy applies. For full details, read our [Return Policy](#).

5. Can I take HempGBX+ on a plane?

Yes, as noted on the TSA website, "Marijuana and certain cannabis infused products, including some Cannabidiol (CBD) oil, remain illegal under federal law except for products that contain no more than 0.3 percent THC (HempGBX+ is verified as less than 0.3% THC) on a dry weight basis or that are approved by FDA.

TSA's screening procedures are focused on security and are designed to detect potential threats to aviation and passengers. Accordingly, TSA security officers do not search for marijuana or other illegal drugs, but if any illegal substance is discovered during security screening, TSA will refer the matter to a law enforcement officer."

Be advised it may result in extra inspection and possible confusion with TSA agents. As always, carrying large volumes of liquids in your carry-on bag is likely to trigger extra inspection and questions. We recommend you provide appropriate padding/protection around your product and check your bag instead of carrying it on.

For more information, please visit the TSA website: <https://www.tsa.gov/travel/security-screening/whatcanibring/items/medical-marijuana>

6. How long does HempGBX+ last?

A 1 oz (30 mL) bottle of HempGBX+ is a 30-day supply based on the recommended use of 1 mL per serving. The shelf life of HempGBX+ is 30 months from the time of production. Check the bottom of the bottle for the exact expiration date of the product you received.

7. Are there side effects from using HempGBX+?

When following the product usage instructions and consuming the recommended amount per day, the natural ingredients that are found in HempGBX+ are not known to contribute to side effects. As always, consult your physician when making changes to your regimen.

8. Does HempGBX+ interact with any other product or medication?

The natural ingredients that are used in the product are not known to have interactions with other products or medications. As always, consult your physician when adding any new supplements or over-the-counter remedies and before making adjustments to your regimen. Our products are not designed to treat, cure or prevent disease.

9. What is the THC concentration & overall cannabinoid concentration in HempGBX+?

The THC concentration in HempGBX+ is less than 0.3%.

The concentration of the Full Spectrum Hemp oil that we use in HempGBX+ is standardized to 25mg of cannabidiol per serving and is blended with other ingredients that improve the bioactivity of nutrients to fully prime and activate endocannabinoid receptors.

To view specific test results for batches of HempGBX+ for cannabinoid profile & terpenes, visit the “Certificate of Analysis” section of our website and reference the lot # on the product bottle.

10. Is HempGBX+ tested and clean from pesticides, toxins, and other contaminants?

The natural sources that supply the ingredients that we use in HempGBX+ come from quality farms that only produce the highest quality ingredients. To confirm that our products are free of pesticides, environmental toxins, heavy metals, pathogens, and other contaminants – and that they meet the very highest standards for purity, potency, and overall quality, we perform multiple quality tests on the ingredients and our finished product.

To learn more about Amare’s Quality Standards and Testing, view our [Quality Control PDF](#).

11. Are there any states that are not friendly to hemp/CBD products?

Although our hemp oil is in Federal compliance with the Hemp Farming Act of 2018, and has a public Certificate of Analysis that confirms that there is less than 0.3% of THC present in our product, each state has the right to set its own legislation and can have separate requirements that may differ from the federal Hemp Farming Act of 2018.

We are aware that the following states have the harshest policies towards hemp or cbd products: Idaho, South Dakota, Iowa, and Nebraska.

The Certificate of Analysis may be accessed on [AmareHempOil.com](#).

12. Can consuming HempGBX+ result in a failed drug test?

If you are subject to any form of drug testing or screening, we advise that you DO NOT consume HempGBX+. Rules can vary dramatically from test to test regarding permissible or prohibited ingredients. Likewise, drug tests can vary dramatically on levels of THC that will show a positive or negative result for THC testing. Before taking HempGBX+, consult with your healthcare practitioner, drug screening testing company, or employer.

13. Is HempGBX+ marijuana?

No. Hemp and marijuana are different varieties of the same genus, Cannabis. Hemp is grown for a variety of purposes, including consumer products and industrial applications and contains very low quantities (<0.3%) of the psychoactive compound THC. Marijuana, on the other hand, is bred to contain high quantities of THC (>0.3%) and produce a psychoactive effect.

SAME FAMILY, DIFFERENT SPECIES

When many people hear “cannabis” or “hemp,” they think “marijuana,” but this is not true. Cannabis is a category of plants such as hemp or marijuana, just like “citrus” is a category of trees such as orange or lemon.

HEMP v. MARIJUANA

Hemp and marijuana are completely different plants with very different chemical properties. Hemp grows to around 20-25 ft. tall and resembles corn stalks, and contains very low quantities of the psychoactive compound THC. Marijuana is a short bush that is usually only a few feet tall and contains high quantities of THC.

HEMP

Hemp and industrial hemp refer to the type of cannabis plant that's farmed for agricultural products such as textiles, seeds, and oils.

- ✓ Grows as high as 25 feet as a single stalk with fewer branches and leaflets.
- ✓ Typically, densely planted to avoid flowering.
- ✓ Average THC content: <1%. Industrial Hemp regulation restricts any THC yield greater than 0.3%.

MARIJUANA

Marijuana is known for its flowering tops, or buds. The flowers are typically bred to yield a high amount of the psychoactive compound THC.

- ✗ Grows short, bushy, and clustered with many flowering buds.
- ✗ Spaced apart for better sunlight, stimulating THC content.
- ✗ Average THC content: 15-20%.

14. Would HempGBX+ be beneficial to pets?

Yes, we have had multiple people use HempGBX+ for their pets. In fact, the ingredients that are found in our products are not known to be contraindicated in use with pets. As always, consult your veterinarian when making adjustments to your pet's regimen.

15. Can I use it topically on my skin versus ingestion into the body?

HempGBX+ can be used topically in addition to being ingested. The ingredients that are used in the product are not known to interact negatively with your skin.
