Fats are often associated with being bad for our health. However, there are some fats that we shouldn't restrict from our diet. Omega-3 fatty acids are amongst those fats, specifically fatty acids EPA (Eicosapentaenoic Acid) and DHA (Docosahexaenoic Acid). These beneficial, polyunsaturated fats are primarily found in fish.

EPA and DHA play a very important role in maintaining healthy brain, immune and cardiovascular functions. These specific fats are converted into hormone-like substances that help regulate cell activity and healthy cardiovascular function, as well as assist with the formation of neurotransmitters which are vital for cognitive function. As we get older, our bodies produce less EPA and DHA, which can affect our mental focus, concentration, memory and other cognitive functions.

Stay healthy and thriving with Amare's high-potency, ultra-pure omega-3 product, OmMEGA. We've formulated this product with ultra-pure marine oil concentrate that delivers high levels of critical omega-3 fatty acids EPA and DHA to help support and promote healthy cardiovascular, nervous, and immune system functions.*

- 1 Provides a healthy balance of all-natural, pure omega-3 fatty acids*
- 2 Protects against lipid oxidation and supports healthy function of the brain*
- 3 Promotes healthy cardiovascular, nervous, and immune system function*
- 4 Supports memory and cognitive health*
- 5 Promotes normal memory, attention control, alertness, mental acuity, and positive mood*
- 6 Helps to regulate the body's natural inflammatory response*

WHAT IS THIS LABEL PATTERN?

OMEGA-3 FATTY ACIDS

Naturally occurring fatty acids, such as EPA & DHA, that help to reduce inflammation and are important in cognitive function.

*THESE STATEMENTS HAVE NOT BEEN EVALUATED BY THE FOOD AND DRUG ADMINISTRATION. THIS PRODUCT IS NOT INTENDED TO DIAGNOSE, TREAT, CURE, OR PREVENT ANY DISEASE.

© 2018, AMARE GLOBAL® ALL RIGHTS RESERVED

Contains ultra-pure and ultra-potent omega-3 content that is approx. 70% more omega-3 (EPA/DHA) than standard fish oils*

Promotes cardiovascular health*

Supports memory and cognitive functions, while promoting a healthy nervous system*

WHAT YOU SHOULD KNOW ABOUT OMEGA-3 FATTY ACIDS

Omega-3 fatty acids are typically found in fatty layers of cold-water fish and shellfish. Our bodies are able to make most fats we need, but lack in the production of omega-3 fats. These essential fats can only be obtained by the foods we eat. Foods high in omega-3 would include fish, vegetable oils, nuts, flax seeds and leafy vegetables.

There are different types of omega-3 fats. The two most important omega-3 fats for cognitive function are Eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA).

EPA has been shown to protect our genes and cell cycle, while also helping to keep our stress response regulated, reduce aggression, and improve focus and attention. Low EPA levels in adolescents and adults have been correlated with the development of mental health issues, cardiovascular problems, and joint and bone conditions.

DHA is a major building block of the brain. It greatly impacts cognitive functions. Evidence suggests that adequate DHA intake may help improve both long-term and short-term memory.

Directions: Take 1-2 softgels with 8-oz of water. Do not exceed 6 softgels per day.

SUPPLEMENT FACTS

Serving Size: 2 Softgels
Servings Per Container: 30

Amount Per Serving		%DV*
